Enhancing Community Supervision through use of Evidence-based Practices: Preparing Supervision Staff to Advance Behavior Change

Crime and Justice Institute

This project was supported by Grant No. 15PJDP-22-GK-03263-SCAX awarded by the Bureau of Justice Assistance. The Bureau of Justice Assistance is a component of the Department of Justice’s Office of Justice Programs, which also includes the Bureau of Justice Statistics, the National Institute of Justice, the Office of Juvenile Justice and Delinquency Prevention, the Office for Victims of Crime, and the SMART Office. Points of view or opinions in this document are those of the author and do not necessarily represent the official position or policies of the U.S. Department of Justice.
Virtual Meeting/Conference Recording Notice

This session is hosted by the National Reentry Resource Center (NRRC). The NRRC is operated by the American Institutes for Research® (AIR®) which allows for the recording of audio, visuals, participants, and other information sent, verbalized, or utilized during business related meetings. By joining a meeting, you automatically consent to such recordings. Any participant who prefers to participate via audio only should disable their video camera so only their audio will be captured. Video and/or audio recordings of any AIR session shall not be transmitted to an external third party without the permission of AIR.
What is the Office of Justice Programs?

- The Office of Justice Programs (OJP) provides grant funding, training, research, and statistics to the criminal justice community.
- OJP is one of three grant-making components of the Department of Justice along with the Office on Violence Against Women (OVW) and the Office of Community Oriented Policing Services (COPS).
U.S. Department of Justice
Bureau of Justice Assistance

BJA works with communities, governments, and nonprofit organizations to reduce crime, recidivism, and unnecessary confinement, and promote a safe and fair criminal justice system.

BJA Director
Karhlton F. Moore
Five Major Strategic Focus Areas

- Improve public safety through measures which build trust with the community and ensure an effective criminal justice system
- Reduction in recidivism and prevention of unnecessary confinement and interactions with the criminal justice system
- Integration of evidence-based, research-driven strategies into the day-to-day operations of BJA and the programs BJA administers and supports
- Increasing program effectiveness with a renewed emphasis on data analysis, information sharing, and performance management
- Ensuring organizational excellence through outstanding administration and oversight of all of BJA’s strategic investments
Fund – Invest diverse funding streams to accomplish goals.

Educate – Research, develop, and deliver what works.

Equip – Create tools and products to build capacity and improve outcomes.

Partner – Consult, connect, and convene.
Office of Juvenile Justice and Delinquency Prevention (OJJDP)

OJJDP provides national leadership, coordination, and resources to prevent and respond to youth delinquency and victimization.

OJJDP helps States, localities, and Tribes develop effective and equitable juvenile justice systems that create safer communities and empower youth to lead productive lives.

OJJDP Administrator

Enhancing Community Supervision through use of Evidence-based Practices:

Preparing Supervision Staff to Advance Behavior Change

Jasmine Jackson and Valerie Meade

April 11, 2023
Presenters

**Jasmine Jackson**
Youth Justice Manager
Crime and Justice Institute

**Valerie Meade**
Deputy Director
Crime and Justice Institute
About the Crime and Justice Institute (CJI)

• CJI bridges the gap between research and practice with data-driven solutions that drive bold, transformative improvements in adult and youth justice systems

• CJI provides nonpartisan policy analysis and practice assessment, capacity and sustainability-building technical assistance, research and program evaluation, and educational activities throughout the country
Improving Community Supervision National Training and Technical Assistance Program

- TTA fully funded through the Office of Juvenile Justice and Delinquency Prevention (OJJDP) to local community supervision agencies to meet the goals of the Second Chance Act.

- “Community Supervision” includes youth placed on supervised probation at the time of disposition and youth released from a juvenile facility under juvenile corrections or juvenile court jurisdiction and placed on aftercare supervision.
Improving Community Supervision National Training and Technical Assistance Program

• Program Goals:
  • improve community supervision practices
  • produce better outcomes for youth and communities
  • reduce recidivism
  • improve public safety
Overview

• Enhancing Community Supervision
  • What are Evidence-Based Practices?

• Effective Case Management and Community Supervision Tools
  • Principles of Effective Intervention (PEI)
  • Cognitive Interaction Skills (CIS)
  • Motivational Interviewing (MI)
  • Graduated Responses (GR)

• It’s All Connected!
Learning Objectives:

• Learn best practices and strategies for improving how staff engage with youth and families;

• Learn how all various evidence-based tools used in supervision fit together; and

• Understand the importance of blending use of these tools together seamlessly.
Enhancing Community Supervision
What are Evidence-Based Practices?
Why is enhancing community supervision necessary?

A more effective alternative to confinement but also a major driver of youth incarceration

Ineffective, non-evidence-based practices are pushing youth deeper into the youth justice system

Left unaddressed, these practices do not hold youth accountable or support rehabilitation and produce poor outcomes for youth, families, and communities
What do we mean by “evidence?”

**Anecdotal evidence:** stories, opinions, testimonials, case studies, etc.

These often makes us feel good, but **may not be accurate**

**Empirical evidence:** research, data, results from controlled studies, etc.

These have a **much higher level of accuracy**, although they sometimes don’t make us “feel good”
Evidence-Based Practices

What

• Fair and responsible use of data

To

• Guide policy and practice

Why

• Improved outcomes
Effective Case Management: 
Tools to Encourage Long-Term Behavior Change
What is Effective Case Management?

- Effective Case Management (ECM) strategies focus on **prosocial change** rather than only compliance

- ECM hinges on creating an **individualized case plan** based on the youth’s situation with steps that are easy to follow

- ECM builds off other evidence-based practices and tools
What is Effective Case Management?

• Rather than a “one size fits all” approach to case planning, individualized case plans coupled with other effective supervision strategies have been shown to significantly reduce technical violation and new arrest rates.

Source: Blasko, Souza, Via, Del Principe, & Taxman, 2016
Community Supervision Tools Used to Encourage Long-Term Behavior Change

- Principles of Effective Intervention
- Cognitive Interaction Skills
- Motivational Interviewing
- Graduated Responses
Question for the Chat:

- **Which of these evidence-based practices are you least familiar with?**
  - Principles of Effective Intervention (PEI)
  - Cognitive Interaction Skills (CIS)
  - Motivational Interviewing (MI)
  - Graduated Responses (GR)
Principles of Effective Intervention (PEI)
Community Supervision Tools Used to Encourage Long-Term Behavior Change

- Principles of Effective Intervention
- Cognitive Interaction Skills
- Motivational Interviewing
- Graduated Responses
Question for the Chat:

- What are red flags that would indicate to you that a youth may be likely to engage in future delinquent behavior?
Principles of Effective Intervention

Risk: Tells you WHO to target

Need: Tells you WHAT to target

Responsivity: Tells you HOW to target

Fidelity: Tells you how to do the work RIGHT
Risk Principle

• The Risk Principle tells us **WHO** to target

• The Risk Principle says: target those youth with higher probability (higher risk) of recidivism
“Big Four” Criminogenic risk factors

1. Antisocial peers
2. Antisocial attitudes
3. Antisocial personality characteristics
4. History of antisocial behavior

Source: Viglione and Labrecque, 2021
Responsivity Principle

- The Responsivity Principle tells us **HOW** to target
  - What gets in the way of the youth benefiting from supervision and treatment?
  - Consider individual learning styles and barriers to interventions

- Examples: trauma, mental illness, motivation, transportation, gender, language, or culture
Fidelity Principle

Source: Latessa, et al., 2013
Question for the Chat:

- On a scale of 1-5, how would you rate your agency’s fidelity when adhering to the risk, needs, and responsivity principles?
How does PEI improve community supervision practices?

• Use of risk and needs assessments give us information about:
  • Necessary level of supervision or intervention
  • Specific criminogenic needs to target with interventions

• Addressing responsivity factors can decrease barriers to intervention

• Fidelity monitoring and coaching can ensure interventions are done as intended
Cognitive Interaction Skills (CIS)
Community Supervision Tools Used to Encourage Long-Term Behavior Change

- Principles of Effective Intervention
- Cognitive Interaction Skills
- Motivational Interviewing
- Graduated Responses
Cognitive Interaction Skills

• Cognitive Interaction Skills (CIS) are cognitive-behavioral approaches that can be used in ALL interactions with youth

• Improve staff’s ability to target criminogenic needs with the youth on their caseloads and contribute to improved outcomes

• Skills that staff should use and model when interacting with youth, both IN and OUT of a formal setting
## Cognitive Interaction Skills

<table>
<thead>
<tr>
<th>Effective Use of Authority</th>
<th>Role Clarification</th>
<th>Giving Feedback</th>
<th>Cognitive Restructuring</th>
</tr>
</thead>
<tbody>
<tr>
<td>Effective Use of Reinforcement</td>
<td>Active Listening</td>
<td>Effective Use of Disapproval</td>
<td>Relationship Skills</td>
</tr>
</tbody>
</table>
Cognitive Interaction Skills

Research has shown that individuals supervised by staff trained in CIS have lower recidivism rates.

Source: Latessa, Smith, Schweitzer, & Labrecque, 2013
Modeling Prosocial Behavior

- Staff must be a **model** of behavior we want to teach
- The youth must see that prosocial behavior has **rewards** that are meaningful to them
Active Listening

- Required to use all CIS skills well
- Shows the youth you’re listening with verbal and non-verbal responses
- Focuses attention
- Helps build rapport
Giving Feedback

Youth are more likely to use prosocial skills if they received simple, direct, and speedy feedback on their skill performance.

Source: Lovins et al., 2018
Role Clarification

- Clearly describe the youth’s disposition and the rules of the supervision

- Clearly describe staff’s role and expectations

- Clearly describe the youth’s roles and expectations
Effective Use of Authority

- Intended to lay out a clear plan for success for the youth

- Helps the youth understand:
  - Expectations
  - Consequences for noncompliance
  - Rewards for compliance

- Acknowledges the youth’s right to choose behavior
Steps for Effective Use of Authority

1. Use a firm but fair approach
2. Focus on the behavior and not the individual
3. Clearly define rules and consequences if the rules are broken
4. Clearly define opportunities for prosocial behavior and what rewards can be earned
5. Reward positive behavior and/or administer consequences for rule violations
Effective Use of Reinforcement & Disapproval

<table>
<thead>
<tr>
<th>Reinforcement</th>
<th>Disapproval</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Promptly identify and focus on the behavior being reinforced</td>
<td>• Promptly identify the problematic behavior and provide a clear, firm explanation why</td>
</tr>
<tr>
<td>• Provide sincere verbal praise with a statement linked to the behavior</td>
<td>• Ask the youth to identify short term consequences for continuing this behavior</td>
</tr>
<tr>
<td>• Ask the youth to identify short term benefits for continuing this prosocial behavior</td>
<td>• Ask the youth to identify long term consequences for continuing this behavior</td>
</tr>
<tr>
<td>• Ask the youth to identify long term benefits for continuing this prosocial behavior</td>
<td>• Return to verbal praise as soon as the behavior is corrected</td>
</tr>
</tbody>
</table>
Cognitive Restructuring Tools

- Cognitive restructuring techniques help address antisocial thinking patterns and show how thoughts are linked to behavior.

- The purpose of these techniques is to help youth learn to recognize risky thoughts and feelings to help them change their thoughts to change their behavior.
Question for the Chat:

- True or False
  - Effective use of reinforcement increases the likelihood that a positive behavior continues by reinforcing the behavior regularly and tying the behavior to larger patterns of prosocial behavior of positive traits
How does CIS improve community supervision?

- CIS can help staff be more effective in targeting criminogenic needs and ultimately reducing recidivism.

- Use of these skills can be built into case plans.

- Effectively using these skills shifts the focus from compliance with conditions to prosocial behavioral change.

- These skills also allow for effective response to violations of conditions.
Motivational Interviewing (MI)
Tools Used to Encourage Long-Term Behavior Change

- Principles of Effective Intervention
- Cognitive Interaction Skills
- Motivational Interviewing
- Graduated Responses
What is Motivational Interviewing?

…a collaborative conversation style for strengthening a person’s own motivation and commitment to change.

-- Miller & Rollnick, 2013
Enhancing Community Supervision

MI Spirit

Acceptance
Compassion
Partnership
Evocation
Motivation as an Interpersonal Process

- Working to develop motivation should be more cooperative than adversarial – more like dancing than wrestling

<table>
<thead>
<tr>
<th>Wrestling</th>
<th>Dancing</th>
</tr>
</thead>
<tbody>
<tr>
<td>• All parties expend a lot of energy</td>
<td>• All parties are working simultaneously</td>
</tr>
<tr>
<td>• Both parties are tired at the end</td>
<td>• They are moving together</td>
</tr>
<tr>
<td>• There is always one person who feels defeated</td>
<td>• There is usually a leader</td>
</tr>
<tr>
<td></td>
<td>• No one feels like they have “lost”</td>
</tr>
</tbody>
</table>
Key Processes of Motivational Interviewing

- Engaging
- Focusing
- Evoking
- Planning

Source: Miller 2012
Basic Strategies of MI: OARS

- O: Ask open ended questions
- A: Affirm
- R: Listen reflectively
- S: Summarize
How does Motivational Interviewing improve community supervision?

- Motivation to change is a **key factor in the success of other interventions**

- Using MI can **improve a youth’s motivation** to change

- MI addresses **WHY** people change, CIS helps teach people how to change

- When applying graduated responses, MI can help the youth **explore how the behavior fits within their goals**
Graduated Responses
Tools Used to Encourage Long-Term Behavior Change

- Principles of Effective Intervention
- Cognitive Interaction Skills
- Motivational Interviewing
- Graduated Responses
Graduated Responses

- Graduated responses are the use of incentives and sanctions to encourage prosocial attitudes and behaviors

- Emphasize responding appropriately to all behaviors (both positive and negative) in a way that will promote prosocial behavior

- Responses to behavior should be proportional to the behavior
How to Effectively Use Graduated Responses

- Use role clarification
- Use effective use of authority
- Ask what incentives and sanctions would be motivating
- Respond immediately
- Use incentives 4 to 5 more times than sanctions
- Apply therapeutic responses
- Choose community-based responses when possible
## Appropriately Responding to Youth Behaviors

<table>
<thead>
<tr>
<th>INCENTIVES</th>
<th>SANCTIONS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Effectively using incentives to reinforce prosocial behavior encourages the youth to continue the behavior</td>
<td>Effectively using sanctions to discourage antisocial behavior is also important</td>
</tr>
<tr>
<td>Incentives should be:</td>
<td>Sanctions should be:</td>
</tr>
<tr>
<td>• Delivered objectively</td>
<td>• Immediate</td>
</tr>
<tr>
<td>• Focused on the behavior</td>
<td>• Delivered objectively</td>
</tr>
<tr>
<td>• Used 4 to 5 times more often than sanctions</td>
<td>• Focused on the behavior, not the person</td>
</tr>
</tbody>
</table>
Question for the Chat:

- How often should you use incentives more than sanctions to encourage prosocial behaviors?
How do Graduated Responses improve community supervision?

- CIS skills **enhance** graduated responses

- Cognitive restructuring tools can be **used in conjunction** with other therapeutic responses

- **Therapeutic responses** can shape case plan updates

- Motivational interviewing can **help identify the internal drive** behind someone’s behaviors
It’s All Connected!
What is Effective Case Management?

- Beyond compliance management, Effective Case Management focuses on leveraging long-term behavior change.
- Hinges on creating an individualized case plan based on the youth’s situation with steps that are easy to follow.
- Builds on Principles of Effective Intervention:
  - Cognitive Interaction Skills, Motivational Interviewing, and Graduated Responses can be used in case management practices.
Developing Case Plans

- Case plan goals address the specific problem or need area
Areas to Consider in Case Planning

- Setting Goals
- Targeting Needs
- Triggers
- Strengths
- Barriers
Characteristics of Effective Case Management

- Individualized
- Team-based
- Flexible
- Sustainable
- Clear
- Identifies benefits
Considerations for Reviewing a Case Plan

- Ask about progress
- Celebrate success
- Discuss ways to overcome struggles
- Discuss changes to the case plan
- Practice new skills
- Offer encouragement
Wrap Up
Summary

- There are many evidence-based tools community supervision staff can use (such as PEI, CIS, MI, and graduated responses)

- These tools can improve case management and create behavior change

- Through using these tools, you can strengthen your approach to community supervision
